I can, but I have some competing priorities now. It won't be this week; maybe next.

Hi Kim,

I'd rather put in an ownership into the SAP than TBD. I looked at the cadastral and the Laurel Ranch Rd site is State Gov't and the other site on Springhill School Rd is private. I looked at the Ankle Rd site and it looks like it might be timber company land but there are some FS crossing nearby we can switch to if necessary.

I just realized with this huge ownership change, the ownership summary stats should be changed too. Eric, can you do that?

Hi Eric and Lisa,

I think this is the same table that we worked with earlier with a new column for ownership (related to maintenance layer).

I will update the ownership values in the SAP to reflect the following:

15 County
3 State
1 Federal + 2 USFS (blank values) = 3 Federal
2 Bozeman

2 To Be Determined

We will need to rename our sites. We previously used the GISB_Owner to determine Federal / State / Private and Local values in the naming convention. The new values can be Federal / State / County / City and TBD.

If you both agree with this, I will send out new sheets for the SAP. I will be out of the office tomorrow, but will return Wednesday!

Thanks,
Kim

Here is the new Excel sheet. Notice that 2 of the locations are in Park County, and do not have values in the MAINTENANCE field, which comes from the Gallatin Co layer. Both have a SYSTEM attribute of USFS in the transportation framework layer.
